

Reversed Osmosis Unit, 5 phase filtration with pressure pump

- free standing
- water pressure supply 3-6 bar
- water quality supply, fully softened water
- water supply 1/2"
- water drain 1/2"
- R.O. water 1/2"
- multiple membranes (8x100GPD Filmtec)
- 5 phase water filtration
- maximum capacity 2400 litre per day R.O.
- voltage 230 Volt / 375W
- rotary pressure pump
- micro-computer controlled
- system pressure gauge
- 2 water-flow meters
- dimensions LxWxH 45x45x140 cm
- weight 62 kg (in use)
- excl. tank

order code for the applied filters

Sediment filter 5 micron:	F-20I-5m
Bloc filter:	F-20I-AC
G.A.C. filter:	F-20I-GAC
Membrane:	TW 30-1812-100
Post carbon filter:	F-IL-PC

To ensure sufficient capacity, we advise to keep the distance to the water supply as short as possible.
We advise to install a water softener before the ROW unit, to minimize the wast water volume.
